

Ballew's MOBILE HOME ROOF SYSTEM

FULLY ENGINEERED TO ENSURE YEARS OF SECURITY AND SAVINGS

Ballew's Roof System installs quickly and simply. No holes are drilled through the surface of your roof. It completely covers your old roof, putting an end to stains from water damage. Installation of the Ballew's Roof System beautifies your home, protects it from weather damage, and saves you money in energy bills and maintenance costs.

Your Ballew's Dealer offers you other professional services that increase the value of your mobile home investment.

Give us a call today to increase your living space and your home's value with screenrooms, carports, patio covers, fully insulated rooms and other home improvement products. We want to help you.

Your Ballew's Dealer can usually complete installation in one day.

INCREASED INSULATION INCREASED R-VALUES

R-Value is the U.S. Government's method of evaluating the fuel efficiency of any unit which uses electricity. The typical mobile home roof provides an R-Value of 12.39. When the unit is insulated with 11/16" double-sided foil-backed foam, the R-Value can increase to 19.22, and increase of 55%.

With the Ballew's System's full 2 inches of double foil-backed foam, the R-Value can increase to 24.43, an increase of 97%! Remember, the higher the R-Value, the more efficient your home. We can confidently offer warranties on our products which are based on experience, quality control and pride.

INCREASE THE VALUE OF YOUR HOME

Ballew's Aluminum Products

- **GUARD AGAINST THE EFFECTS OF WATER AND WIND DAMAGE**
- **GUARD AGAINST COSTLY REPAIR BILLS**
- **GUARD AGAINST OUTSIDE NOISE**
- **AND SAVE ENERGY AND MONEY**

The Ballew's Roof-Over System triple seals your home with three protection layers: two full inches of foam insulation, vent guard tape, and aluminum pans with a baked enamel finish.

Guard against the elements that fight your roof from the day you move into your home. Sun bakes it in the summer. Wind chills it in the winter. Rain finds a way inside.

The fully engineered System we install puts an end to all these problems. Plus, it gives you a barrier against outside noise.

Ballew's Roof-Over System uses a specially formulated tar tape to seal vents against leaks and water damage.

roof system that pays
for itself.*

BEAUTIFIES & PROTECTS YOUR HOME

Ballew's Roof System is custom-fitted to your home and is available with a wide selection of trim colors.

CUTS ENERGY BILLS

Two inches of additional insulation cut energy bills by stopping heat loss in the winter and by keeping the cool inside in summer.

MAINTENANCE-FREE SURFACE

The baked enamel surface ends messy repainting and roofcoat jobs. Ballew's guarantees the surface, and the warranty transfers should you sell your home.
